

# GROMMETS AND WASHERS

Stimpson grommets and washers are manufactured from brass and zinc and are available in base metal or with popular nickel or dull black chemical finishes. They meet military and commercial specifications including AN-230, MIL G 164910 and MS-20230. Stimpson grommets and washers may be set with the Stimpson #405 Bench Machine or with existing self-piercing tooling currently available.

## PLAIN BRASS SELF-PIERCING GROMMETS AND WASHERS

No hole is needed with this self-piercing grommet, newly designed and incorporating heavier gauge brass than traditional sheet metal grommets. The self-piercing grommet is employed with a unique washer which allows piercing and setting in a single action — without the need for pre-punching a hole. Can be used with the Stimpson #405 Bench Machine or with existing self-piercing tooling currently available.

Product Number	Size	I.D. (Hole size after setting)
GWSP-0	0	1/4"
GWSP-01	1	5/32"
GWSP-02	2	3/8"
GWSP-03	3	7/16"

Standard Put-Up: 500 piece box    FOB Chicago, IL    Special volume pricing

# STIMPSON HAND TOOL

## #405 BENCH MACHINE

Product Number 405 Cast Iron

Product Number 405-A Aluminum

Ideal for low production runs. Will set grommets, snaps and a wide range of other fasteners.
